

Welcome to the SURF Program!

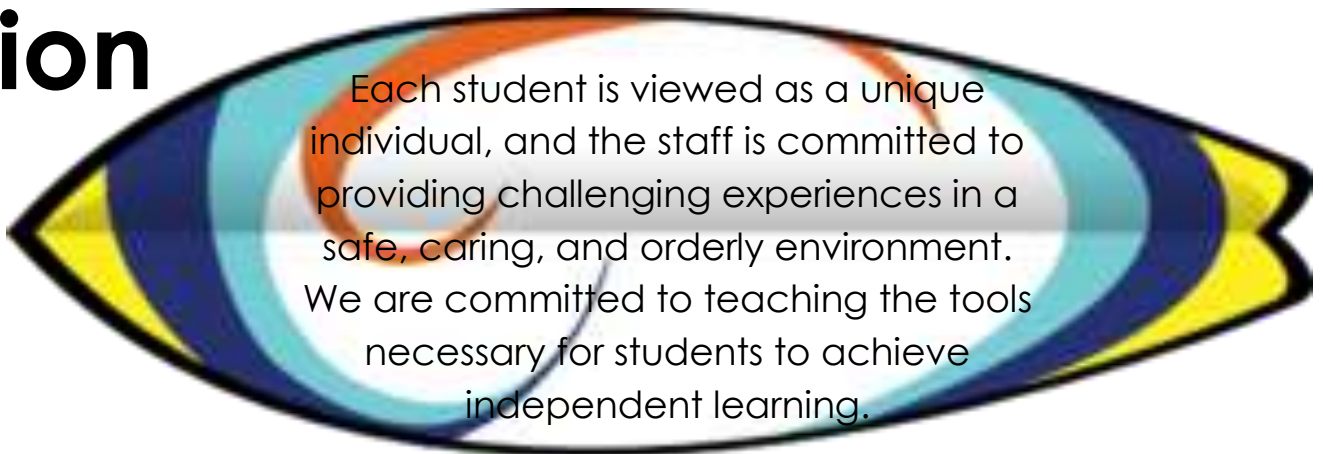

Vision

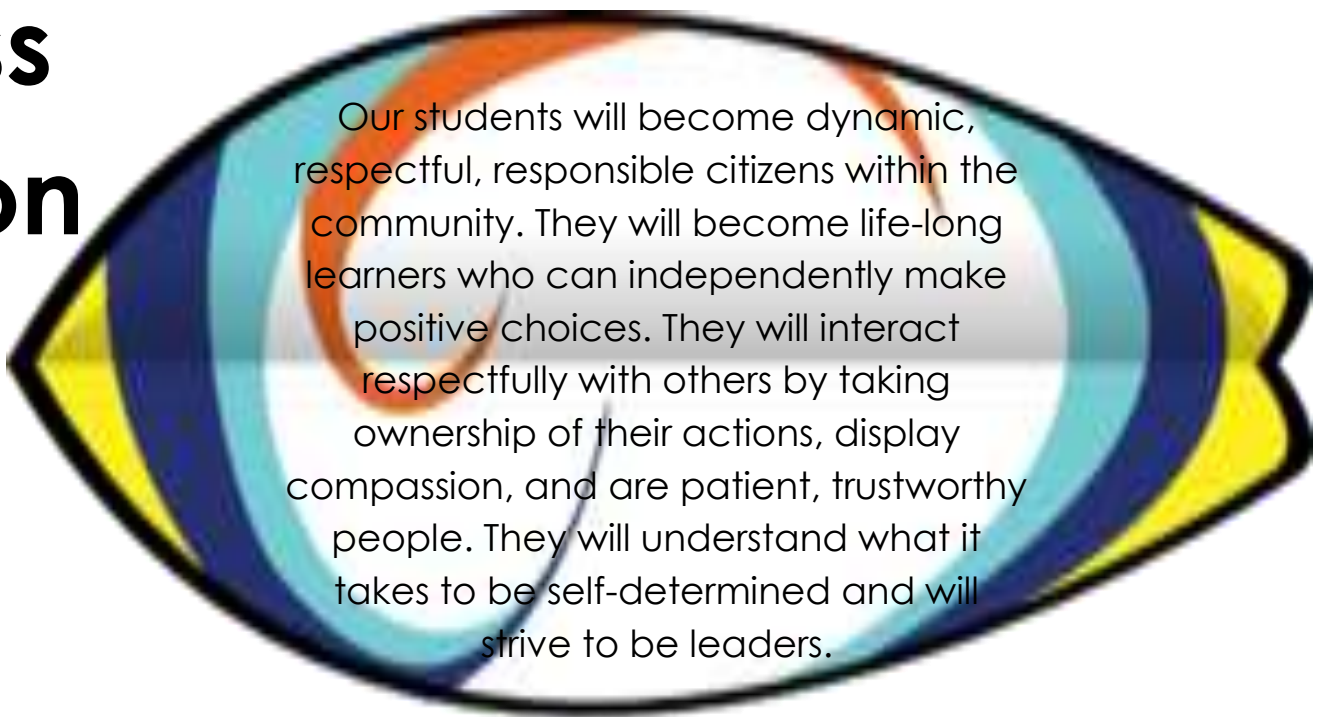

To see students develop personal skills, a love for learning, and a cooperative interaction with others

Mission

Each student is viewed as a unique individual, and the staff is committed to providing challenging experiences in a safe, caring, and orderly environment. We are committed to teaching the tools necessary for students to achieve independent learning.

Class Vision

Our students will become dynamic, respectful, responsible citizens within the community. They will become life-long learners who can independently make positive choices. They will interact respectfully with others by taking ownership of their actions, display compassion, and are patient, trustworthy people. They will understand what it takes to be self-determined and will strive to be leaders.
